PROFESSIONAL SUMMARY

Software Engineering student (CGPA: 3.67) with practical experience building responsive full-stack web applications, secure authentication workflows, and relational/document database schemas. Proficient in React, Next.js, Node.js, Express, Better Auth, MySQL, and MongoDB. Committed to clean architecture, reliable engineering fundamentals, and practical problem-solving.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Java, Python, C/C++, SQL, HTML5, CSS3
Frontend: React.js, Next.js, Tailwind CSS, Responsive UI Design, Web Accessibility
Backend & Auth: Node.js, Express.js, Better Auth, JWT, Stateless Sessions, RESTful Architecture
Databases: MySQL, MongoDB
Tools & Concepts: Git, GitHub, Postman, Vite, Vercel, OOP, Data Structures & Algorithms

FEATURED PROJECTS

Dr. Md. Momenul Islam Health Assistant | *Next.js/React, Python, Vector Search* - Prototype | GitHub
Evidence-grounded health information assistant prototype - Built in memory of Dr. Md. Momenul Islam

- Developed a multilingual health assistant interface addressing queries across English, Bangla, and Banglish.
- Grounded clinical guidance using curated NHS sources with transparent source provenance tracking and safety disclaimers.
- Implemented deterministic out-of-scope refusal protocols and emergency routing to avoid ungrounded generative advice.
- Built modern web interface; retrieval pipeline runs in local high-memory environment with full triage walkthrough.

NoboGhat | *Next.js, React, Node.js, Express, MySQL* - Live Demo | GitHub
Full-stack multi-vendor marketplace & logistics platform

- Developed a high-performance frontend using Next.js and Tailwind CSS with server-side rendering.
- Engineered backend APIs connected to a relational MySQL schema with role-based access control.
- Implemented end-to-end user flows including product discovery, shopping cart state management, and checkout.

HeliosTrack | *React, Node.js, Express, MongoDB* - Live Demo | GitHub
Distributed solar energy monitoring dashboard with real-time telemetry

- Designed and built a responsive telemetry dashboard visualizing distributed solar array outputs.
- Developed REST API endpoints with Node.js and Express to ingest and serve inverter telemetry data.
- Structured MongoDB schemas for efficient querying of generation metrics and real-time operational status.

EDUCATION & TRAINING

Bachelor of Science in Software Engineering - Daffodil International University (DIU)
Current CGPA: 3.67 | Expected Graduation: 2028

Full-Stack Web Development Training - Programming Hero (Batch 14, In Progress)
Intensive practical training covering modern JavaScript, React, Next.js, Node.js, Express, Better Auth, and MongoDB.
